

The Worlds 1st

Female

Dictator

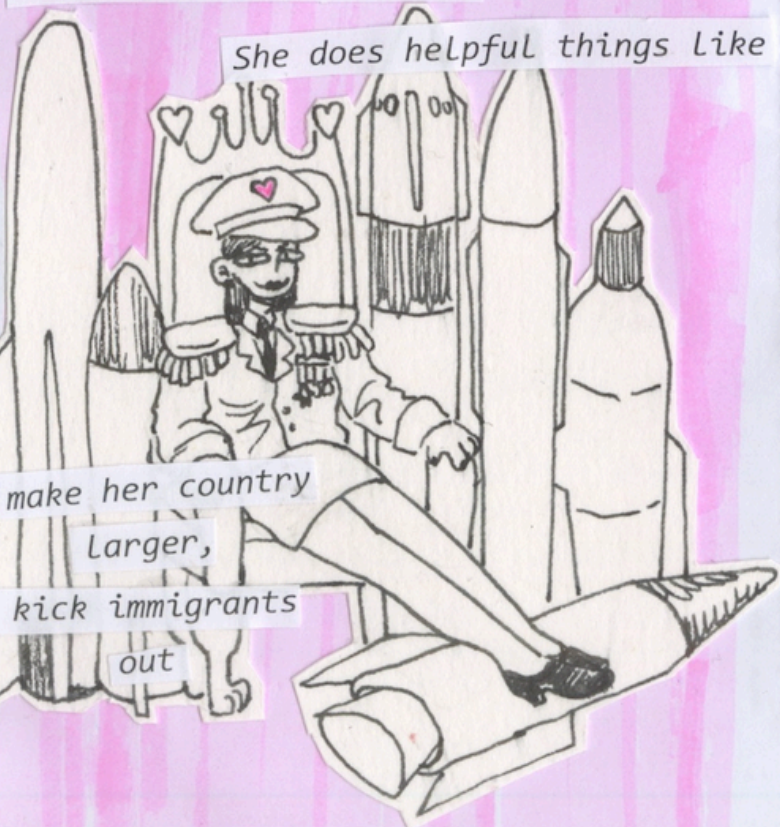

This is the world's first female dictator.
She's not the first, but she wants to be
remembered as the first.

She does helpful things like

make her country
larger,
kick immigrants
out

and buys nice big missiles

for rainy days.

This is her gay little vice president.
He's about to experience twink death
but is in denial. He gets sent to meet
people and then they die suddenly.

Anyway, this isn't about him.

The world's first female dictator is a girlboss and a trailblazer. She's just like you and me. Some women say she actively makes their lives harder. They say she's made everyone work harder for less, that she hates minorities and that she's not a feminist because she reinforces harmful systems of power.

They disappear soon after.

This is because they are not girl's girls.

The world's first female dictator makes sure business is booming. Everyone is welcome to work in her munitions factory, apart from the world's first female dictator and her friends.

They have important things to do.

Like take horse tranquilizer.

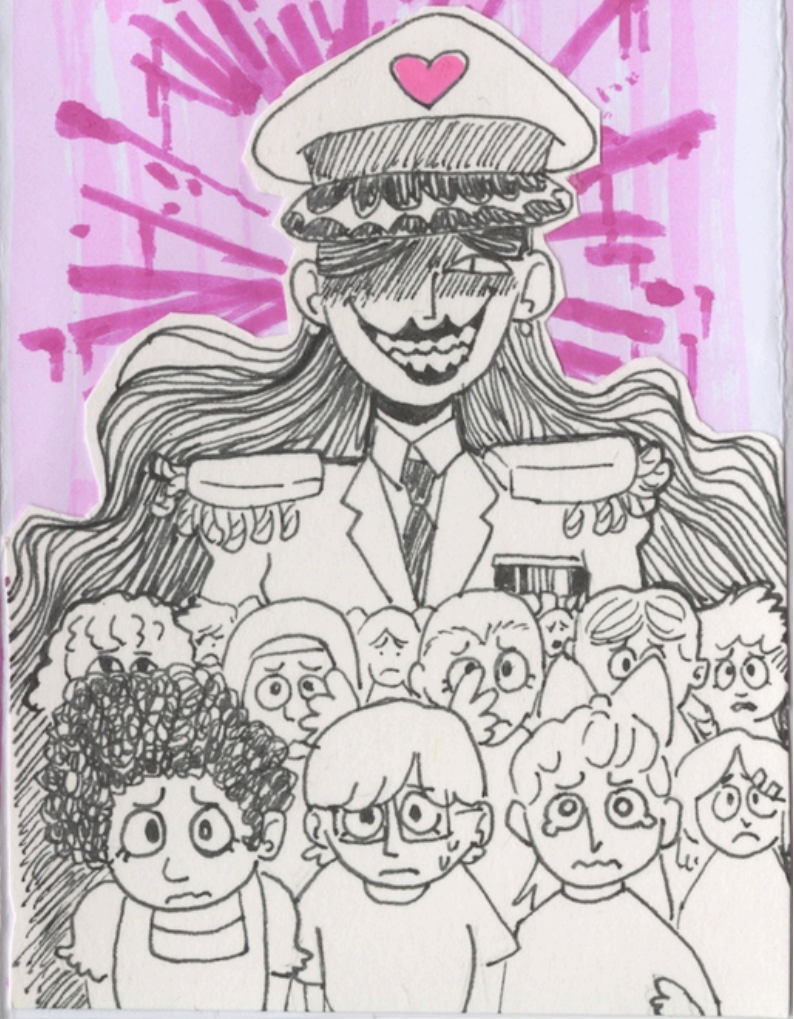

The world's first female dictator is one of a kind, an all-powerful, independent woman. And because she's the first,

all the little girls in the land know

that none of them can be.

THE
FUTURE
IS
FEMALE
