

LOVE LETTER

A OF THE LOST ART WRITING

And warm.

Love letters straight from your heart...

It all starts with one *hello*...

Tell her about it...

I remember the first time I wrote a love letter to my crush...

I went to the library just to pick the right words to say to her...

How attractive her eyes are....

to you...

writing letters

I will never get tired

She is always, always on my mind...

I never stopped smiling...

As I write her a letter

the simple giggle...

I can only glance at you....

Because staring at her is overwhlming...

Her smile captivates me...

Even when she throws her hair is like in slow motion...

The way she carries herself...
